

22

First Mid Sem Exam-BIO202-Cells and organismal architecture
Marks-25

Name: SIDDHANT PANDA
Roll No: MS24129

Mark the correct answer from the choices. Each question carries 1 mark. 0.25 negative marking for wrong answer

1. The ratio of an object's image size to its real size is referred to as
 - a) Resolution
 - ✓ b) Magnification
 - c) Contrast
 - d) Isolation
2. Cell fractionation is a technique used to
 - a) Separate nucleus from cell
 - ✓ b) Separate cell membranes
 - c) Separate ribosomes
 - ✓ d) Separate major organelles
3. The place where ribosomal RNA transcribes is called
 - a) Ribosomes
 - ✓ b) Rough endoplasmic reticulum
 - ✓ c) Nucleolus
 - d) Nuclear lamina
4. Which organelle is responsible for packaging proteins for dispatch
 - ✓ a) Lysosomes
 - ✓ b) Golgi apparatus
 - c) Peroxisomes
 - d) Ribosomes
5. What anchors the cilia and flagella on to the plasma membrane
 - ✓ a) Basal body
 - b) Transmembrane protein
 - ✓ c) Microfilament
 - d) Axial body
6. Name the cellular structure that stabilize the cells from outside
 - ✓ a) Cytoskeleton
 - ✓ b) Extracellular matrix
 - c) Centromere
 - d) Centrosome
7. Microfilaments contain which of these
 - a) Axin
 - ✓ b) Fibrillin
 - ✓ c) Myosin
 - ~~d) Tubulin~~ d) Tubulin
8. Ribosomes are isolated using technique called
 - a) Gradient centrifugation
 - ✓ b) Parallel centrifugation
 - c) Serial centrifugation
 - ✓ d) Differential centrifugation

9. Lysosomes mainly contain

- a) Carbohydrates
- ☒ b) Digestive enzymes
- c) Lipids
- d) Mineral

10. The ER with ribosomes attached is called

- a) Smooth ER
- ☒ b) Rough ER
- c) Endomembrane ER
- d) Nuclear lamina ER

10

Mark the True or False in the box.

1	Dynein is considered a motor protein of cilia/flagella	True ✓
2	Only the Ribosomes attached to the ER play role in protein synthesis	False ✓
3	Every animal cell exhibits ameboid movement	False ✓
4	Bacteria has the organelle mitochondria	False ✓
5	Animal cells cannot have vacuoles	True False ✓
6	Golgi apparatus is not part of endomembrane system	False ✓
7	Surface area to volume ratio varies according to size of the animal	True ✓
8	Cell wall is a unique feature in animal cells	False ✓
9	Central vacuole in plant cells carry only water	False ✓
10	Microfilaments are not part of cytoskeleton	True X
11	Immunofluorescence is a natural property of proteins	True X
12	Resolution limit of light microscope is around 1uM	False X
13	Bacteria do not have ribosomes	False ✓
14	Centrioles are the only source of tubulin in a cell Golgi apparatus is not part of endomembrane system	False ✓
15	A food vacuole is formed as a result of phagocytosis	True ✓

12
